## EDUCATION

---

<b>Aleppo University</b> <i>Master's Degree in Computer Engineering</i>	Aleppo, Syria 2019
<b>Aleppo University</b> <i>Bachelor of Engineering in Computer Engineering</i>	Aleppo, Syria 2014

## WORK EXPERIENCE

---

<b>SALVIMAR GmbH</b> <i>Frontend Web Developer</i>	Germany/Remote Sept 2020 - Oct 2021
---	--

- Convert designs and wireframes into responsive reusable components therefore producing an efficient and easily testable app with less overall cost
- Used libraries such as Redux to manage the web application's state, and make asynchronous API calls in order to maintain consistency across client, server, and native environments
- Increased customer satisfaction by collaborating with different teams in an Agile environment to write clean, maintainable, and testable code in addition to fixing bugs and adding new features to existing applications

<b>Freelance</b> <i>MERN Stack Developer</i>	Syria/Remote Mar 2019 - Present
---	------------------------------------

- Developing applications following a 3-tier architecture (Frontend, Backend, Database) using Javascript and JSON
- Making use of React.js for Frontend, Node.js as a server-side framework, and MongoDB as the document database
